

# Gotharman's Little deFormer 3

Granular Workstation

Update Manual 9.40

-When Part Select/Mutes are latched, the Morph Set and Start/Stop buttons will now keep their original functionality (In V9.45 they would function as preset select).

-When LD3 are in external MIDI sync mode, the tempo indicator on the Preset Select page (the main page), will now show "EXT", to make it easier to see, that LD3 are in external sync mode.

**Bug Fixes:**

-When recording the last piece of a sample bank, LD3 would sometimes freeze. This has now been fixed.
