

# Gotharman's Urano

Modular Synthesizer

Update Manual 0.50

## Table of Contents

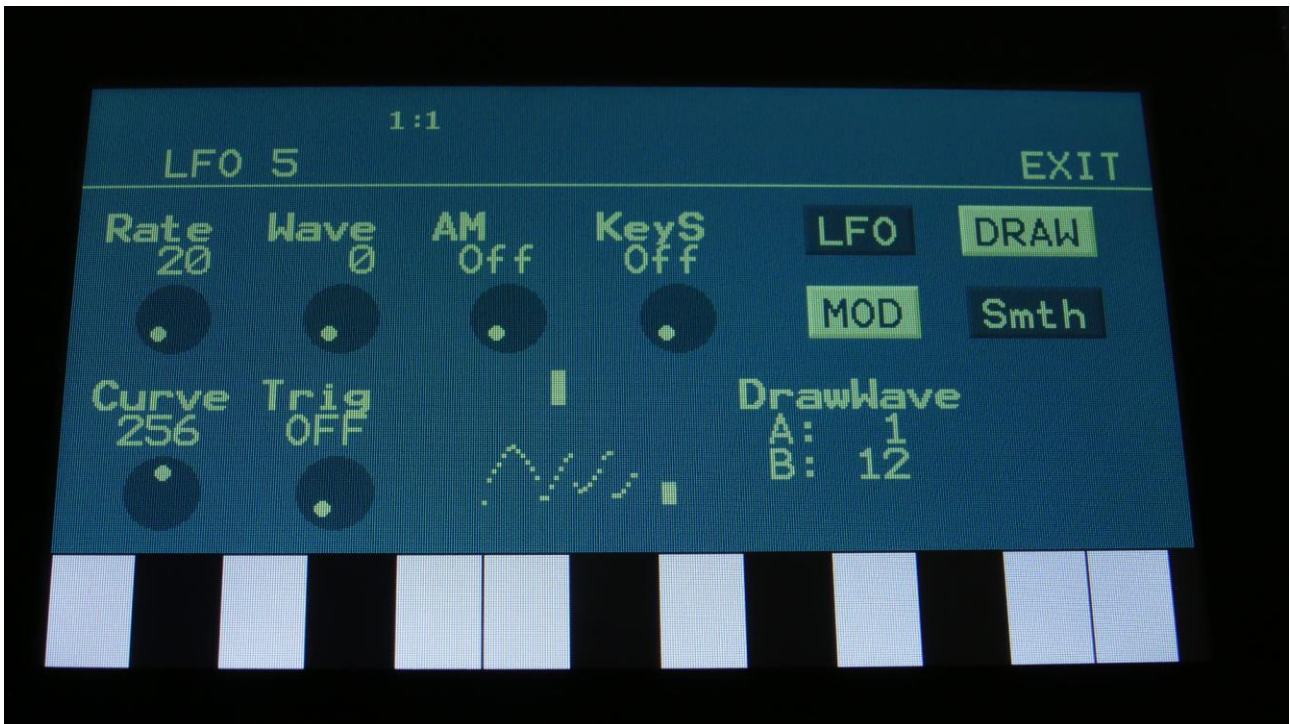

Bug Fixes.....	3
LFO Draw Waves Smoothing.....	4
Panic and All Notes Off .....	5

## Bug Fixes

- Something went wrong with the effect select system, after the last update. This has now been corrected.
- Oscillator Type parameter names were not always correct. This has now been fixed.

## LFO Draw Waves Smoothing

Another new touch button, **Smth**, has been added to the LFO pages. When this is active (dark blue), the LFO Draw Waves will be a bit more smooth.

## **Panic and All Notes Off**

When the Panic function is activated (Func/Mute > Copy > Exit), or a MIDI All Notes Off message (CC123) is received, all sample playback will now be stopped.
